COMING AND GOING

J. I. Manchester is in Toledo on business.

Mrs. F. A. Morris is recovering from her illness.

Miss Lole Hine spent Tuesday in Youngstown.

J. B. Jones is ill at his home on North Broad street.

W. Jarvis Smith had business in Pittsburgh last Saturday.

Miss Pearl Manchester is recovering from an attack of influenza.

F. W. Calvin of Locust Grove was in the village Thursday afternoon.

Mr. and Mrs. C. C. Fowler spent Sunday with relatives in Cleveland.

Mrs. Floyd Hushour is ill with influenza at her home east of the village.

S. A. Arnold is able to be at the Dispatch office after a week's illness.

Mr. and Mrs. J. M. McCrone of Poland visited in Canfield Monday evening.

Mr. and Mrs. E. C. Diehl spent Wednesday with relatives in Ellsworth township.

Mr. and Mrs. Edson Mayer and little daughter of Dublin are quite sick with influenza.

Miss Blanche Anderson of Youngstown spent Monday evening with Canfield friends.

Miss Pauline Schaefer of Ellsworth Station was in Canfield a few hours Wednesday afternoon.

Misses Kate and Grace King of Youngstown spent last Sunday here with Mrs. Lottie King.

Mrs. W. P. Hollister spent several days this week with relatives and friends in East Palestine.

J. C. Newport of Cornersburg called at the Dispatch office while in the village Tuesday afternoon.

Mr. and Mrs. C. W. Hunt of Cleveland, well known in Canfield, are sojourning in St. Augustine, Fla.

W. C. Raine is again on duty at the Manchester Co. hardware store after an absence of a week or more.

Mrs. F. L. Cogill of Cleveland visited here the past week with her parents, Mr. and Mrs. James Williams.

Miss Maude Dooley, who has been very ill with flu, is slowly recovering at the home of Charles Chidister.

Mrs. J. W. Baird and sons Warren and Clare are ill at their home on Court street, suffering with influenza.

Rev. S. B. Lowrie, pastor of the M. E. Church, and family are confined to the parsonage, suffering with influenza.

Mrs. Frank Sanzenbacher and Mrs. Emma Crowl of East Palestine visited here Wednesday at the home of John Sanzenbacher.

Miss Sarah Barnes, one of the oldest residents of the village, is quite ill at her home on West Main street, suffering with pneumonia.

Miss Beth Burger, formerly of Canfield, is now in Washington, D. C., where she accepted a position in the war risk insurance department.

George Wetmore has returned to his ship after enjoying a ten-day furlough at his home here. He expects to be given his discharge in March.

Miss Laverne Hull, daughter of Mr. and Mrs. Geo. Hull, is suffering a second attack of influenza within a month and for several days has been very sick.

R. A. Manchester, who is being treated for cancer at a sanitarium in Goshen township, spent last Sunday here at home. He has promise of being cured.

Albert Platt, for many years a resident of Canfield, is at the home of his daughter, Mrs. O. L. Manewal, in Salem, suffering from the infirmities incident to advanced years.

Mrs. Mary Howard, Mr. and Mrs. Stanley Howard and daughter Doris of Patmos and M. H. Gunders of Berlin Center spent Monday evening here with Mr. and Mrs. W. E. Rose.

Miss Caroline Toot returned home Wednesday afternoon from Youngstown where she spent a month and Thursday evening went to Salem to visit her cousin, Mrs. Alice Pow, for some time.

Ceester Baringer, who enlisted in the Marines some months since but was not taken into the service because of being underweight, left Tuesday for Boston where he was called for further examination.

Mrs. Grace F. Burger, who resided in Canfield quite a number of years, is now living in Leominster, Mass. She writes: "New England surpasses my imagination. I am living on a high spot that overlooks 40 miles of wooded hills and fields in the direction of the Atlantic ocean, which is not 50 miles from us."

SPRING SAMPLES RECEIVED
I have just received from Buckley Bros. Co., New York City, my first installment of spring samples of dress goods, ginghams, voiles, linens, etc. Also the custom made Kiora corset. I will be pleased to show same at my home on West Main St., Canfield, or if preferred will visit any who are interested at their home.

Phone 22 LOIE M. HINE.

Notice is hereby given that Orville T. Kline, North Jackson, O., has been appointed and qualified Executor of the last will and testament of Joseph Kline, late of Youngstown, Mahoning County, Ohio, deceased. The ready reckoner has to do something of more account than to say, "I reckon."

Lots of canned goods comes strained. Even canned music comes in strains.

STOP THE ARMY WORM.

Watch Meadows Closely—Spray, Poisoned Bait, and Ditch Traps Will Control the Pest.

Watchfulness is the first weapon to use against the army worms. Upon the discovery of the pest in its younger stages depends very largely the possibility of stamping out infestations before serious injury to crops has occurred, declare entomologists of the United States Department of Agriculture.

Army worms are the young of certain moths or millers that fly only at night. The eggs from which the army worms hatch are commonly laid on grasses or grasslike grains and the tiny caterpillars, upon hatching, feed for several days near the ground, hidden by overhanging grasses or grains. They may escape notice until nearly full grown, by which time they have become widely distributed over the infested fields.

Meadows should be examined frequently during the spring and early summer months, particularly those planted to timothy, bluegrass, wheat, and especially millet. One should not be satisfied with looking merely at the surface of the stand; the thicker and longer the growth, the greater the danger from the army worm. The grain or grass should be parted with the hands in various parts of the field and the lower portions of the growth examined closely, in order that the presence of the small, greenish caterpillars may be discovered. If these be found in any number the area covered by the infestation should be determined and rigorous action taken at once to destroy the worms before they become large enough to begin their journey to other portions of the farm. If the infested spot be small, the grass or grain can be mowed off and straw scattered over the spot and burned, thus destroying the worms.

If the caterpillars have become distributed over a considerable area this can be marked off by stakes and the crop sprayed heavily with a mixture of Paris green at the rate of 1 pound to 50 gallons of water. If tender plants, such as corn, are to be sprayed, 2 pounds of freshly slaked lime should be added to 50 gallons of the mixture, to prevent burning of the foliage.

In case the worms are crawling in a body around them with a furrow or ditch and crush them with a log drag as they fall into it. If shallow post holes are sunk in the bottom of the ditch at intervals of about 20 feet the worms will crawl along the ditch bottom and fall into the holes, where they may be destroyed.

Poisoned baits of varying composition have long been used as a means of destroying the many different species of cutworms and also the army worm. An effective bait of this kind may be prepared and used as follows: To 50 pounds of wheat bran and 1 pound of Paris green or 2 pounds of arsenate of lead add the juice of one half dozen oranges or lemons. Then bring the mass to a stiff dough by adding low-grade molasses or syrup, preferably molasses, and scatter the mixture broadcast in small pieces throughout the infested field. This poisoned bait may be used safely in alfalfa and corn fields where it is desired, if possible, to save the crop for forage purposes.

In case this poison is used, care should be exercised in preventing stock from gaining access to the poisoned grass or grain and being injured or killed by eating it. It is far better to sacrifice a portion of the crop, if the destruction of the pest can be accomplished, because if army worms are not destroyed they will take the crop away and probably devastate other portions of the farm.

Additional information regarding the army worm may be obtained from Farmers' Bulletin 73, which will be sent on application to the Department of Agriculture.

GREEN FORAGE CROPS LOWER COST OF PORK.

Pork production is cheaper with grain and green forage crops than with grain alone. Some grain is necessary for fattening hogs on pasture. Clover and alfalfa rank among the best crops for swine pasture.

An acre of clover had a value, in replacing corn in ration, of \$10.02 in one test made by the Ohio Agricultural Experiment station, with corn valued at \$1.68 a bushel. Red clover ranked first among swine forage crops in tests made at the Experimental station. Rape, soybeans and bluegrass followed in order of efficiency. While alfalfa was not tested, it usually ranks a little above clover.

The number of hogs an acre of pasture will carry is influenced by their age and thriftiness, the amount of forage produced, the amount and nature of the concentrates fed, and other factors. When given somewhat less than a full feed of grain, from 8 to 14 fall or winter pigs and 12 to 20 spring pigs may ordinarily be pastured on an acre of average clover or alfalfa, and from 500 to 600 pounds of pork should be produced.

Prices of grain and amount of pasture determine largely the quantity of concentrates to feed hogs on forage. It is doubtful whether less than half of a full feed should be given hogs on pasture if intended for market. Exclusive pasture feeding results in slow gains.

Sheep sorrel can not be entirely exterminated by mowing, but it can be greatly weakened. The weed should be mowed as soon as the flowering stalks have attained full size, but before they have commenced to turn red.

Poisonous Waste Causes Sickness
When the kidneys are well they filter waste matter from the blood. When sluggish or overworked, the kidneys fail to clean the blood, and poisonous substances lodge in points and muscles to cause aches, pains and soreness. Foley Kidney Pills strengthen and quickly and relieve kidney and bladder trouble. Sold everywhere—adv.

Give a hungry man something to eat before handing him advice.

TRACTOR SCHOOL AND GRAIN SHOW

Two Features of Ohio Farmers' Week at Columbus.

MANY LECTURERS ENGAGED

More Than Twenty Agricultural Associations Will Meet at College of Agriculture, Ohio State University. During the week of Jan. 27-31. Dates of the Meetings of the Associations—All Sessions Free.

The seventh annual Farmers' Week at the Ohio State University college of agriculture will be held from Jan. 27 to 31. A general program for farmers and their families will be amplified by the programs of more than 20 agricultural associations that will meet during the week.

Two features will be the second annual Ohio farmers' tractor school and the eleventh annual Ohio state corn and grain show.

Big Tractor Demonstrations.
Twenty-five companies are expected to enter machines for the tractor demonstrations. These will be in charge of specialists. Ten lectures on practical tractor problems will be given by agricultural engineers of prominence.

Several new classes have been added this year for entry in the grain show, including spring wheat and wheat exhibits of oats, wheat, barley, rye, alfalfa, timothy and clover, and a class for the best bushel of certified seed potatoes.

Demonstrations in the grading of corn will be given by representatives of the United States Department of Agriculture. Visitors will see how wheat and shelled corn are graded under federal standards at the large markets, where the work is supervised by representatives of the Bureau of Markets. The exhibit of the United States Department of Agriculture includes all the equipment used in determining grain grades, samples of different classes of corn and wheat, and various commercial samples of grain of different grades.

Men with the government exhibit will demonstrate how a sample of wheat or corn is taken from a car by means of a "probe" or "trier," so as to represent an average sample of the whole car, and they will show how a sample is mixed, divided mechanically, and the moisture, dockage, and test weight per bushel are determined by special equipment.

Many Prominent Specialists.
Prominent among the list of 125 speakers during the week will be Jane Addams, head of Hull House, Chicago; D. D. Atkin, president of the Holstein-Friesian Association of America, Flint, Mich.; C. P. Borge, agronomist of the Minnesota college of agriculture; Governor Cox; Dean Eugene Davenport of the University of Illinois college of agriculture; I. W. Dickerson, agricultural engineer, Charles City, Iowa; J. G. Halpin, head of the department of poultry husbandry of the University of Wisconsin; B. H. Hibbard, professor of agricultural economics of the University of Wisconsin; Rose Morgan, specialist in community singing, New York city; Theodore A. Peck, agricultural engineer, Saginaw, Mich.; Mary Rose Swartz, Columbia University; Mr. Sogstad, agricultural engineer, Chicago; E. B. White, president of the Percheron Society of America; E. A. White, F. M. White and A. P. Yarker, agricultural engineers. President W. O. Thompson of the Ohio State University, who recently returned from a tour of England and France, where he was sent by the federal government to study agricultural conditions, will give several lectures, illustrated with motion pictures.

On the animal husbandry program, Monday is to be sheep day; Tuesday, beef day; Wednesday, horse day; Thursday, hog day, and Friday, meat and market day.

Dates of State Meetings.

Following are the dates of the different state agricultural associations to be held during the week:
Ohio State Corn and Grain Show, Jan. 27 to 31; second annual Ohio farmers' tractor demonstrations, 27 to 31; Ohio Farm Bureau Association, 27, 28; Ohio Sheep and Wool Growers' Association, 27; Ohio State Horticultural Society, 28 and 29; Ohio State Vegetable Growers' Association, 28 to 30; State Farmers' Institute, 28; Ohio Beekeepers' Association, 28 and 29; Ohio Rural Life Association, 29 to 31; reunion of Washington corn tourists, 29; Ohio Percheron Breeders' Association, 29; conference of Boys' and Girls' Club workers, 30 and 31; Ohio State Dairywomen's Association, 29 to 31; Ohio Jersey Cattle Club, 29; Ohio Guernsey Breeders' Association, 30; Ohio Creamery Owners' and Managers' Association, 30; Ohio Milk Distributors' Association, 30; Ohio Milk Producers' Association, 30 and 31; Holstein-Friesian Breeders' Association, 31; Ohio Swiss Cheese Association, 31.

Programs of Farmers' Week may be had of the Agricultural College Extension Service, Columbus, O.

To the Dyspeptic.

Would you not like to feel that your stomach troubles are over, that you can eat any kind of food that you crave? Consider the fact that Chamberlain's Tablets have cured others—why not you? There are many who have been restored to health by taking these tablets and can now eat any kind of food that they crave—adv.

At any rate, the fellow who brings up in the rear leaves one to talk about him behind his back.
